

Owner's Statement of Acceptance

N.H. Green Yards Certification

name, street location, city, state

Congratulations! Your above-referenced auto recycling yard meets the requirements for being designated a "Certified N.H. Green Yard" under the provisions of a pilot program offered by the N.H. Department of Environmental Services. Certified N.H. Green Yards are a group of automotive recyclers that have demonstrated exemplary environmental business practices and meet certain other licensing and regulatory requirements. DES, working in cooperation with the N.H. Auto & Truck Recyclers Association, developed the pilot program to improve environmental business practices at auto salvage yards throughout the state. DES is pleased to recognize your efforts to help make auto recycling environmentally friendly. DES will issue your N.H. Green Yards Certificate after we receive your signed statement of acceptance, below. Please send the signed statement to:

Pamela H. Sprague
N.H. Green Yards Program
N.H. Department of Environmental Services
P.O. Box 95
Concord, N.H. 03302-0095

I request the N.H. Department of Environmental Services to issue an official certificate designating my above-referenced facility a "Certified N.H. Green Yard." I understand and accept the following certification conditions and limitations:

1. In order to keep the designation "Certified N.H. Green Yard." my facility must stay in compliance with the applicable environmental best management practices and applicable local, state, and federal requirements.
2. I am entitled to fly the Certified N.H. Green Yard Flag at my facility and use the Certified N.H. Green Yard logo on business related materials only while the certification remains valid.
3. DES can terminate certification for good cause, including failure to consistently maintain compliance with the applicable environmental best management practices and applicable local, state, and federal requirements.
4. If certification is terminated, I must cease flying the flag, using the logo, and representing in any other manner that my facility is a Certified N.H. Green Yard.
5. DES will periodically visit my facility to verify that facility operations remain in good standing as a Certified N.H. Green Yard. The visits may be unannounced.
6. Because the Certified N.H. Green Yard program is a pilot-program, the requirements for certification may change. The requirements may also change as the automotive recycling industry changes. Following notification, I agree to incorporate any such changes in my business within a reasonable period of time, or surrender my certification.
7. To maintain and update certification, I understand that DES may require me to periodically audit my facility for compliance with applicable environmental best management practices and applicable local, state, and federal requirements, and submit a written compliance statement.
8. I understand that the designation "Certified N.H. Green Yard" does not guarantee my facility complies with all applicable regulations, nor does it provide protection against citizen or third party legal actions.
